

The goal is to enable free and conscious participation, so that the audience knows what kind of event they are attending.

Knowing when to "let go of the image" is an integral part of the practice.

The camera captures a collective energy, not individual identities.

AUDIENCE AWARENESS

The goal is to enable free and conscious participation, so that the audience knows what kind of event they are attending.

Before each use of this template, the audience must be informed of the presence of cameras and the possibility of interacting with them. A clear message (digital, displayed on paper or announced) must be presented before the start of each event. Here is the text to copy and display:

PUBLIC NOTICE MOUVOIR EXPERIENCE

←BACK

By attending this “Mouvoir” labelled event, you are taking part in a **unique experience** where your **movements** and the **atmosphere of the night** influence the visuals in real time. **Your safety first:** only “Mouvoir”-certified VJs and videomakers, identifiable by the label's badge, are authorised to capture images. Everyone is committed to respecting the label's charter: each capture is used exclusively **live**, no video will be recorded or broadcast, and **anonymity** is guaranteed through the application of filters and aesthetic effects making every face and body unrecognisable. Join in with joy and freedom — thank you!

← BACK

Filmed moments are captured live and must never be recorded, stored or broadcast outside the live context of the event. Templates are designed for real-time processing and incorporate pre-recorded sequences. If a VJ wishes to use external footage, they must have obtained the explicit prior consent of the people filmed, specifying the exact use of those images.

Mouvoir prioritises the experience of the moment, not its trace.

← BACK

The CAMERA
captures ENERGY
NOT IDENTIFY

Videos must never be broadcast in their raw form. An aesthetic effect, filter or distortion (abstraction, pixelisation, silhouette, etc.) must be applied in order to make the identity of each person unrecognisable.

This guarantees everyone the freedom to dance and move without the pressure of being filmed as they truly appear.

THE ANONYMITY
OF DANCERS ∞

The camera captures a collective energy, not individual identities.

←BACK

NO body type, NO skin, NO colour, NO gender, NO physical ability, NO age, should be mocked, exaggerated or excluded.

Visuals must celebrate diversity without stereotypes.

This rule means avoiding any sexualising or objectifying framing, particularly of feminised bodies. The body must be represented as a vector of energy and movement, not as a passive object of desire.

RADICAL
BODY
INCLUSION

←BACK

The device must

NEVER
TARGET
ISOLATE
or
HARASS

an individual.

DIGITAL
IN CARE

Knowing when to "let go of the image"
is an integral part of the practice.

Zooming intrusively on a face without implicit (expressive dancing) or
explicit consent is prohibited.

The VJ must be able to recognise when their presence creates
discomfort and react accordingly, so that the audience always feels
at ease.
