AUDIENCE AWARENESS

REGLE_01

The goal is to enable free and conscious participation, so that the audience knows what kind of event they are attending.

Before each use of this template, the audience must be informed of the presence of cameras and the possibility of interacting with them. A clear message (digital display, on paper or through loudspeakers) must be presented before the start of each event. Here is the text to copy and display:

REGLE_02B

Filmed moments are captured live and must never be recorded, stored or broadcast outside the live context of the event. Templates are designed for real-time processing and incorporate pre-recorded sequences. If a VJ wishes to use external footage, they must have obtained the explicit prior consent of the people filmed, specifying the exact use of those images.

REGLE_02

Mouvoir prioritises the experience of the moment, not its trace.

must never be broadcast in their original form. Aesthetic effects (distortion (abstraction, pixelisation, silhouette, etc.) must be applied in order to make the identity of each person unrecognisable.

REGLE_03C

This guarantees everyone the freedom to dance and move without the pressure of being filmed as they truly appear.

REGLE_03

THE ANONYMITY
OF DANCERS

The camera captures a collective energy, not individual identities.

Règle_04A

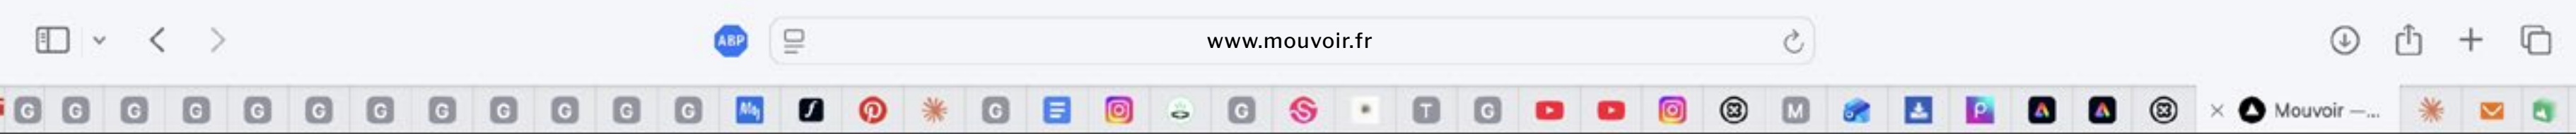

Visuals must celebrate diversity without stereotypes.

Règle_04C

This rule means avoiding any sexualising or objectifying framing, particularly of feminised bodies. The body must be represented as a vector of energy and movement, not as a passive object of desire.
